

Come Join Us!

Whether you are an expert, occasional user, or just interested in understanding what GIS is, come see how GIS is used locally by government, academic, and private industry professionals.

GIS Day

Exhibits • Map Gallery • Networking

Wednesday, November 18

11:00AM - 1:00PM 2020

Virtual Event

<https://calpoly.zoom.us/j/82996937995>

Zoom ID: 82996937995

What is GIS?

A GIS is a geographic information system. GIS helps people think spatially and approach problems from a geographic perspective.

GIS integrates hardware, software, and data to help people understand a wide variety of information about our world. This spatial data is typically viewed on digital and hardcopy maps that reveal patterns, illustrate problems, and show connections that are not otherwise evident.

GIS Day is hosted by SLO GIS User Group with support from URISA, Cal Poly, and local government agencies.

“Lightning talk” presentations and GIS news
